CONSTRUCTION WORK BEGINS ON NH ROUTE 102 IN HUDSON
RECONSTRUCTING AND WIDENING A THREE-QUARTER MILE SEGMENT

The New Hampshire Department of Transportation announces construction work is underway on the reconstruction and widening of approximately three-quarters of a mile of NH Route 102 in Hudson. This project on NH 102 runs from Highland Avenue north to the intersection with NH Route 3A.

Initial work in 2006 will include tree clearing and utility relocation. Two lanes of traffic will be maintained during the project, with occasional lane closures necessary. Flaggers will be used to guide motorists through the work zone.

Continental Paving, Inc. of Londonderry, New Hampshire is the contractor for the \$2.8 million project, which has a final completion date of spring 2008.
